二月十日是學校的「戶外學習日」。早上,我們在操場集 合,等待乘搭旅遊巴士前往烏溪沙青年新村。 到達目的地後,我們首先拍大合照,然後玩集體遊戲。我 最喜歡「老虎、老鼠」遊戲。我是「老鼠」,我要捉住「老虎」 的手。我成功捉住了很多次,所以贏了。 接着,我們進行自由活動,我到各個不同的遊戲場地玩耍。 我選擇了滑滑梯和打籃球。滑滑梯和投球真有趣啊! 中午十三時,我們收拾物件,然後乘坐旅遊巴士回學校去。 今天的「戶外學習日」真難忘,我希望可以再參加呢!

美麗的水中世界 今天, 媽媽帶我到水族館觀賞海洋生物, 令我見識到美麗的水中世界。 來到水族館, 我們首先看到水母。我驚嘆道:「嘩」那些水母好像一個個果凍。」媽媽說:「你只懂得吃。」職員介紹說:「這是黃金水母。」 接着, 我看見美麗的珊瑚魚, 我說:「這也太好看了吧」 快們和水母一樣都是金燦燦的。」然後, 我們看見了河豚。 媽媽說:「河豚有一點像石頭啊」」我就覺得牠的刺好像壞 人的武器。

一天,他把一隻山鹿牽上朝廷,並對秦三世說:「這 是一匹寶馬,是我特意獻給陛下的。」秦二世笑着說: 「丞相弄錯了,把鹿說成了馬。」趙高就問左右大臣,有 的大臣懼怕趙高, 不敢作聲; 有的為了討好趙高, 便附和說 是馬;剛正不阿的大臣則直說是鹿。 事後, 趙高把敢說真話的人冠上各種罪名殺掉。 這個故事教導我,不要顛倒是非,指鹿為馬。例如:我

我們看到很多遊人拿着白兔燈、西瓜燈、飛機燈……我們 走着走着,看到有人放了漂亮的煙花,我、爸爸、媽媽和哥 哥就坐下來欣賞。後來,我們又一起賞月和賞燈,看着又圓 又大的月亮和栩栩如生的動物花燈, 漂亮極了 ! 接着,我和家人一邊說着中秋節的由來,一邊吃月餅, 爸爸說:「其實中秋節的由來是從一個叫「嫦娥奔月」的傳 說開始。相傳嫦娥吃了仙藥飛上了月球,與丈夫后羿天地相 隔。自此,后羿每年都在這天對着月亮設宴懷念嫦娥。中秋 節這個中國傳統節日,便是從嫦娥奔月這則民間傳說而來。 聽完爸爸說這個故事後,我驚嘆地說8 「原來中秋節是 這樣來的。」我心想 8 嫦娥奔月這個故事情節不僅多姿多彩,

還表達了后羿對嫦娥真切的情感,真是令人感動呀! 最後,我和家人要回家了。可是我意猶未盡,就要依依 不捨地離開了。維多利亞公園不但風景優美,而且節日氣氛 濃厚, 我下次一定還要去!

這個故事讓我印象最深刻的人物是灰姑娘,因為她十分 善良,就算被人虐待也不怨恨他們。同時,我深深地為灰姑 娘的悲慘遭遇而傷心! 這個童話故事讓我體會到,要做一個善良的人,因為做 好人就一定會有好報。我們一定要像灰姑娘一樣,從小就養 成一顆善良的心。這個故事使我懂得只有外表美麗並不是真 正的美麗,唯有心靈美才是真正的美,心靈美最珍貴!

記一次學校大掃除

九月, 又是一個新學期。學校安排全體師生進行一次大 掃除, 打掃我們的課室, 還我們一個乾淨衞生的學習環境。 我們自備工具, 人人都「全副武裝」, 戴上口罩和手套, 拿起抹布和掃帚,就像準備戰鬥的小戰士們。 老師把我們聚集起來, 分配好每個人的職務, 我被安排 負責整理書櫃,這正是我最喜歡的工作。我和同學們合力把 書櫃上的物件搬下來,用濕抹布細緻地把每個角落都擦一遍。 很快抹布就變成了一個污頭垢面的「小可憐」,滿身都是灰 塵。隨後, 我們把書櫃上的東西物歸原位, 一會兒就大功告 成了。 由於我們配合得很有默契,因此很快就收拾好了書櫃, 於是我們決定去幫其他同學。我們一會兒擺擺桌椅,一會兒 掃掃地板, 一切都很順利地進行着。直到我們準備收尾時, 發生了一段小插曲——垃圾袋上有個破洞, 卻沒人注意, 每 當有垃圾裝進去,那個洞就擴大一點。待我們把垃圾拿去扔 的時候, 垃圾卻從那個缺口湧了出來, 散落了一地。我們= 下子都愣住了,眼睜睜看着這一地「雞毛」,一時有些不知 所措。班長嘆了回氣,又重新拿起掃帚,無奈地說:「別愣 着了,大家一起合作!趕快重掃一遍吧!」 最後,大家看着整潔乾淨的課室,心中既自豪又滿足, 能在這樣的課室裏學習是一種享受啊!這次大掃除不是我一 個人的努力,是大家一起配合,一起攜手完成的。我從中學 習到了互相合作, 共同承擔的團隊精神。真是一次有意義的 大掃除し

Growing Rice as a Way to Solve Hunger'

Today, I watched a video named "Growing Rice as a Way to Solve Hunger" with my parents during dinner. The video opened my mind to the understanding of rice. Its role is more than just a crop! From the video, I found that "Growing rice" is a technology to solve hunger of a region and when hunger is resolved, the manpower resources could be released for other national related developments or for other productions. Therefore, poverty of a region could be solved.

However, I really don't understand how to relate "Growing Rice" with national security. My mum put down the chopsticks and explained, "When our country solves poverty, our country is able to support herself with crops. Then we can guarantee that crops can support our soldiers during war. Thus, this increases the national security level." "Wow! I never think that tiny white rice has such role in national security! I never thought how to relate a technology with national security, other than those military considerations." I looked at my bowl of rice in my hand and said. Mum continued, "It comes with two important elements: First, can the technology solve the common problems of the other countries? Secondly, is our country holding the way to solve the problem? One day, when you can also make effort to secure our national security." Mum kneaded my forehead lightly and smiled to me. "Understand. To begin, let us learn and well equip ourselves with different knowledge and capabilities." I said.

On Thursday, after the assembly, Ada was roaming in the school hall. Then she saw a poster of Halloween Party and a costume competition. She wanted to buy a fairy costume for the Halloween Party but she remembered that she did not have enough money. She sighed sadly, `Oh! I don't have enough money. I cannot buy any costumes." Then, an idea popped in Ada's mind. She thought, 'If I don't have enough money, then why don't I make my own costume?" She went home after school and started working immediately. She used an enormous plastic bag, a large piece of paper, a long wooden stick and a lot of straws. Next, she used scissors to cut out the neck and sleeves. She also used a stapler to staple the hat. She used tape to stick the straws on the long wooden stick. On the day of the party, Ada wore her handmade costume to the party. Once she stepped in, everybody looked at her costume.

They shouted, `Ada, your witch costume is so cool! You will win the competition!' They adore her costume.

A Review of the video – 'Growing Rice as a Way to Solve Hunger'

I used to think that rice is just a mediocre food we eat in our daily life. But, after watching this video, I realise that rice has such an important role in our

Rice are mainly used to feed people. It is a primary source of energy for over half of the world's population. For people living in Asia like me, we eat rice every day! Rice can also stop poverty in countries such as Africa and Nigeria. Although these countries have enormous land for growing crops, they still face the problem like insufficient production and high consumption. The professionals from advanced countries should lend them a hand. We should help them to solve this issue. Meanwhile, it also reminds me that we should treasure the rice we eat every day since some people on the other side of the Earth are still starving!

I hope one day there will be no poverty and everybody can live a happy healthy life!

My Most Memorable Experience in P6 6B Coco 符 芳 瑜

My most memorable experience in Primary 6 was visiting my favourite secondary school.

It was on 16th February. After school, I went to the secondary school with some schoolmates and three teachers. The students were put in different groups. Each teacher led one group. I was in Miss Ng's group.

The day was Open Day of the secondary school. There were many activities we could do. First, we went to the playground. Their school band was performing. They received many claps. Then, we visited their study clubs. We met students who studied in our school before at Maths Club. They told us to study hard and wished we could go to our favourite secondary school. We played games at the club too. I got a lot of gifts after the games.

Visiting my favourite secondary school was a joyful experience. I felt delighted. The students in the school were kind and confident. I am going to be more diligent. I am going to improve my English to prepare for my secondary school life. I hope I can go to my favourite school which I visited. *

Protecting the Environment

6C Layna 區丁蕾娜

Protecting the environment is a crucial responsibility that we all share. There are many small steps we can take to reduce our impact on the environment.

We can conserve water by turning off the tap while brushing our teeth or fixing any leaky faucets.

We can reduce waste by recycling , composting, and using reusable bags and containers. We can also reduce our carbon footprint by using public transportation or carpooling, using energy-efficient lightbulbs and appliances, and conserving energy whenever possible.

These may seem like small actions, but they can make a big difference in protecting the environment and preserving it for future generations.

Japan is a big country in Asia. Tokyo is the capital of Japan. One of its famous landmarks is Mount Fuji. It is the highest mountain in Japan. Also, it is the second highest volcano in Asia. Besides, Shirakawago is a nice village too. It is famous for its hotels and beautiful views.

Moreover, Japan is also famous for its cuisine such as sukiyaki and udon. Sukiyaki is a dish that is served in Japanese hot pot style. It is very popular in Japan.

In Japan, people celebrate Awa Odori Festival. Awa Odori is the largest dance festival in Japan. It is held in August. Performers wear traditional costumes, and chant and sing as they parade through the street.

Japan is also famous for its animation, such as Anpanman and Doraemon. These are must watch animations! Japan is a wonderful country with a lot of fantastic things. I hope everyone can visit Japan one day!

Hong Kong is my Favourite City

6E Kit 甄振結

Hong Kong is the place where I live and love. So I am going to write about the features of Hong Kong.

Hong Kong is famous for its landmarks such as Victoria Harbour, the Peak and so on. The Victoria Harbour is a place where you can ride on ferries and look at the beautiful view whereas the Peak is the place where you can view Hong Kong from the mountain top. These places are good to visit.

Hong Kong is also famous for its festivals such as Chinese New Year and Mid-Autumn Festival. At Chinese New Year, you can watch lion dances and receive red packets. At Mid-Autumn Festival, you can eat mooncakes and play with lanterns. But if you don't like what I previously mentioned, you can also eat yummy food such as egg tarts, fish balls, noodles with dumplings and more. They are yummy and I'm sure you will like it.

Although Hong Kong is a small city, I still think Hong Kong is a wonderful place with a lot of culture in it. I hope everyone can come and visit Hong Kong someday.

Conservation of Plant Diversity

3A Cerena王蔚然

Plant diversity and ecological balance are very important to people. They make our lives easier and more convenient. Indeed, we can't live on the earth without them.

However, the ecological balance is getting worse and worse because of human activities and environmental changes.

The most important thing is to maintain plant diversity and ecological balance. Firstly, our government should make a clear law to

do this. Secondly, botanic gardens for protecting some precious plants should be built. Thirdly, we should also reduce plant waste and pollution to the environment.

All in all, we can take many actions to protect plant diversity and make our world more beautiful.

拼砌立體模型

拼砌立體模型是否只是遊戲呢?絕對不是!一年級同學要 先搜集不同的立體圖形,然後分類統計,再拼砌成立體模型, 最後向同學匯報成果。這絕對是一段豐富的學習歷程。

三、四年級同學化身設計師,把不同的三角形或四邊形拼 拼砌砌,組成了一幅幅生動的圖畫。

我運用了: 等邊三角形6個、 直角三角形6個。

溫埼淇

我運用了: 等邊三角形8個、 等腰三角形2個、 直角三角形3個。

小狗

我運用了長方 形、正方形及菱形組 成圖案,它們相同的 特性是對邊平行,對 邊長度相等。

同學們巧妙地運用不同大小的圓

圖形面積計算 同學以幾何圖形拼砌成不同的圖案,並計算其面積,發揮 創意之餘,亦鞏固了對面積的概念及運算能力。

吃飽的小貓

2×2÷2×2=4 兩個三角形的面積是4cm²。 10×4=40 大長方形的面積是40cm²。 2×2×2=8 兩個正方形的面積是8cm²。 4×4=16 大正方形的面積是16cm²。 1×4=4 小長方形的面積是4cm²。 (6+2)×2÷2×2=16 兩個梯形的面積是16cm²。 4+40+8+16+4+16 這個圖案的總面積是88cm²。

 $\begin{array}{c} (2 \times 1 \div 2 \times 2) + (2 \times 2 \times 4) + (3 \times 1 \times 2) + \\ (2 \times 3) + (5 \times 3) + (6 \times 3) + (11 \times 3) \\ = 2 + 16 + 6 + 15 + 18 + 33 \\ = 18 + 6 + 6 + 15 + 18 + 33 \\ = 24 + 6 + 15 + 18 + 33 \\ = 30 + 15 + 18 + 33 \\ = 45 + 18 + 33 \\ = 63 + 33 \\ = 96 \end{array}$

立體圖形製作

五年級同學自行繪畫紙樣,製作成正方體或長方體,然後 組合成不同的形象,再加以裝飾。製作過程考核同學知識之餘, 亦提供機會讓同學發揮創意。

不甘示弱:「你才是假的!」於是,它們去見國王「1」。國 王「1」看了看他倆,笑了。他威嚴地說:「你們誰也沒冒 充誰。 $\frac{3}{4}$,你是眞分數; $\frac{4}{3}$,你是假分數。」正說着,金光 閃過, $\frac{4}{3}$ 變成 $1\frac{1}{3}$ 。國王說:「 $\frac{4}{3}$,你可以變成帶分數 $1\frac{1}{3}$,亦可以變成小數 1.3;而 $\frac{3}{4}$ 可變成小數 0.75。」就這 樣,一場風波平息了。

昨天,我幫媽媽去購物。我在肉檔買肉時,檔主說 他的秤壞了,只好用天平,但他沒上過學,平時是他兒 子幫他計算的,他兒子今天生病了,他問我可以幫他計

算嗎?我答應了。

天平的左邊有一塊肉和一個 50 克砝碼,右邊有兩 個 200 克和一個 100 克的砝碼,我用設方程來計算。設 肉重Y克,Y+50 = 200 × 2 + 100,Y = 450,即 肉有450克,檔主為表感謝,幫我買的東西打了折。

現代社會交通繁忙,人工 智能無人駕駛可以減輕人力資 源,使交通運輸更安全,也便 於收集乘搭的數據,改善交通 規劃。我們嘗試製作AI人工智 能無人駕駛巴士,驗證相關技 術。在過程中,我們學習了使 用AI人工智能晶片、認識圖像 辨析技術、教導AI辨認交通狀 況和解決自動「埋站」的問 題。

、把巴士放在路面 進行念次測試

参加校外 LE審

設計人工智 能軟件也花 了很多時間

為了學懂新的AI編程語言,我們進行了6小時的訓練。最 後,我們解決了在不同光影下,車輛辨認路面和急轉彎的問 題;解決了辨認巴士站時,屏幕顯示站名的問題。我們還利用 這巴士參加了「大灣區智慧交通校際挑戰賽」,與內地小學生 交流人工智能技術,獲得了優異成績!

乒重動遊戲機

疫情期間,很多人因未能外出、約不到朋友等原因,而缺 乏運動。有見及此,我們設計了一個易於在家中進行的遊戲, 希望讓大家重拾運動的樂趣。我們利用真實的運動器材,結 合micro:bit來製作遊戲。我們把micro:bit貼在球拍背面,希望用 家使用時,感覺就像在打真實的乒乓球一樣。

遊戲機的設計原理是利用micro:bit的感知器, 感知球拍 移動,然後控制遊戲中的球拍擊球。編程時我們要計算及設 定球速,亦要計算球拍的滑行距離和遊戲分數等。我們利用 了Scratch的邏輯方塊, 製作起來還算容易。我們還邀請了同 學試玩,以改善發明。希望大家會覺得這遊戲和打真正的戶 乓球一樣有趣!

我們盡量保持 球拍的原貌

邀請同學測 試,收集回饋、 改善設計

投籃機

6A張勝禮、 6A Aazan

我們的投籃遊戲機可以感應球進入籃框,並自 動記錄分數。我們使用了數字顯示屏,超聲波感應器 及碰撞 認應器。在編程的時候,我們以外接的延展板 加強了micro:bit的功能,使它可以接駁更多感應器。

4A向展樂、4A 翁雋翹

我們設計的重點是籃球機要穩 定,以及有聲光效果。除了感應進球 及自動訂分外,進球後還有閃燈及 聲音效果。希望同學可以玩得開心!

6B趙最旭

我利用LEGO SPIKE Prime系列的 積木組成了一個籃球 發射機。玩家要把球 射入籃中,最高分即 勝出。籃球發射機可 以調整機器的角度, 甚至發射的力度,以 瞄準投射。我的作品 還在機械人比賽中得 到了金獎呢!

同學以減少海洋 垃圾為目標,利用 micro:bit裂作 海洋 清道夫」遥控船,以 收集垃圾,為環境保 育出一分力。

我首先利用了3D打印技術製作了一個搖桿,並裝上 micro:bit,成為控制迷宫的裝置。之後,我設計了一個迷宫 遊戲的介面,由於已學過利用Scratch編寫程式,所以只 用了1小時便完成了基本程式。之後,我逐漸把音效、動 畫、計分方法加入迷宮,增強可玩性。最後還公開邀請同 學試玩,收集改善的意見。
